## *Hello there,*

We're Earthborn, an independent, family owned company which started out nearly 20 years ago. Committed to providing a range of paints that are less harmful on the environment, we're proud that our paints are healthier to use and better for the fabric of the building. These values still ring true today, and because of our unique recipes we are able to offer a distinctive, mellow colour palette with a finish of the highest quality.

Our partnership with Country Homes & Interiors brings you a beautiful collection of modern country colours. Designed to work in harmony with the Classic Earthborn palette or as standalone shades, helping create the perfect backdrop to your home.

We hope you enjoy flicking through our inspiration guide and we'd love to see how you use your Modern Country Colours, please tag us in your projects

### A little reminder:

We try our best to achieve the closest reflection to our paint colours in all our print material, but to make sure it's the perfect colour for you, we would recommend you test with one of our handy 100ml sample pots.
